Dear Friends:

After Hurricane Charley devastated our community we were unable to engage a general contractor - all too busy. We were forced to hire our own subs and received sub-standard workmanship. Your company was highly recommended by Jim Grakan - owner of American Test Control. Jim's comment was "if you can get Don Teets you're lucky". We are happy to say we were lucky to have Don's team do our lair.

We were here to witness the lair "rough in" and we're convinced the house would blow away in a CAT 5 Hurricane, but the lair would be still standing.

Now that we see the finished product we are more than pleased - Don Teets Contracting Inc. has exceeded the recommendation and our high expectations. They have given us a first quality final product. Your team is a first class operation. We have one big regret "We didn't have you for our entire refurbishing". Thanks Don and the #1 Team - you're the best.

Sincerely

Bill + Audrey Hogan
